

Introducing!

MyModules

For Android
and iPhone

- Record your modules right in the field on your smartphone.
- Can automatically capture GPS coordinates.
- Instantly transmit module data to the gin.
- Review module status right on your phone.

An *eCotton* product by EWR, Inc.

MyModules

Register your modules as they are made or after the fact. Data is **transmitted** to the gin's computer instantly!

Works for individual producers and Custom Pickers!

Track the status of your modules.

Drill down for lists of your modules. Drill down again to see module details!

Set up is quick and easy using data provided by the gin.

MyModules guides you through the set up process.
